Mohamed Shadir

Skills

- **JavaScript** | jQuery | Node | Express | **PHP** | **MySQL** | CSS | **SASS** | WordPress | **GitHub** | **Drush** | **Drupal** | **Twig** | Gulp | **Lando** | REST | Slack | Git
- **Platform Sh** | **Docker** | **Linux** | **Composer** | **GitHub Actions** | **Jira** | **BitBucket** | GitLab | **Agile** | **DigitalOcean** | **Blade** | **Laravel** | **Claude** | **Next.js**
- **WooCommerce** | Bootstrap | **Tailwind CSS** | **Nginx** | Elementor | **Breakdance** | **Vue JS** | React | **Postman** | **Cursor** | Alpine JS | Redis | **Supervisor**

Experience

Senior Software Engineer (On-site)

Seluh, Khaitan, Kuwait

Mar 2025 - Present

- Led development of scalable web and RESTful API applications using Laravel 10 and Laravel 12, including ERP SaaS platforms and service booking systems, applying a modular monolithic architecture for maintainability and scalability.
- Architected and maintained the Mend service booking platform (seluh.com) using Laravel 10, delivering admin and customer-facing web applications, integrated with mobile APIs to manage services, bookings, and operational workflows.
- Designed, developed, and deployed the Omnia ERP SaaS application (app.omnia-i.com) using Laravel 12 APIs, covering system architecture, database design, Dockerized deployment, third-party integrations, and payment workflows.
- Implemented Tap Payments and KNET payment gateway integrations across both Seluh (Mend) and Omnia platforms, handling secure transactions, callbacks/webhooks, payment verification, and error handling.
- Built and deployed the Omnia marketing website (omnia-i.com) using Next.js, and the Mend landing website (mendkw.com) using Laravel 12, Blade, and Tailwind CSS, hosted on DigitalOcean with Nginx.
- Managed production infrastructure and DevOps workflows, including Docker, Nginx, Redis caching, queues, background jobs, mail notifications, Supervisor, and CI/CD pipelines using GitHub Actions.
- Implemented secure authentication and API access using Laravel Sanctum, collaborated with frontend and mobile teams, and performed API testing, debugging, and documentation using Postman.

Laravel Developer (Remote)

Alphabetical IT, Texas, USA

Nov 2024 - Apr 2025

- Gained hands-on experience in developing web applications using the **Laravel 11** framework. Demonstrated proficiency in working with Laravel's MVC architecture, **Eloquent ORM**, and **Blade** templating engine. Integrated **third-party APIs** and services, ensuring smooth data flow and optimized application performance.
- Experienced in creating **RESTful APIs**, building dynamic web applications, and implementing authentication and authorization systems. Actively participated in code reviews and followed coding standards to maintain code quality and security.
- Worked within **Agile** environments, using **Jira** to track tasks and collaborating with cross-functional teams, including Business Analysts and Project Managers, to ensure timely delivery. Utilized **Git** for version control, ensuring smooth collaboration within the team.

PHP Developer (Remote)

Fat Beehive, London, England

Oct 2023 - Oct 2024

- Worked on multiple charity websites, primarily as a **Drupal back-end developer**, fixing bugs and building new functionality. Experienced with HTML, CSS, **SASS**, **Gulp**, **JavaScript**, and **jQuery** on the frontend, and **PHP**, **Twig**, and **Drupal CMS** (including contributed and custom module development) on the back-end. Skilled in using **NPM**, **Composer**, and **Drush**.
- Proficient in the Drupal paragraphs and views, having built various components with it. Experienced with **Bitbucket** and **Platform.sh** (both UI and command-line), **Docker**, **Linux**, and **Lando**. Familiar with **Jira** software and **Slack** for team communication and project management.
- Configured and maintained Drupal modules to enhance site capabilities and performance. Utilized Drupal's Views module to create dynamic and flexible content displays tailored to specific user needs. Managed content types and fields in Drupal to optimize data structure and improve site functionality. Implemented responsive design principles to ensure compatibility across various devices and screen sizes.
- Conducted site performance optimization through caching strategies and best practices for improved load times. Performed regular site maintenance and updates to ensure security and stability. Engaged in troubleshooting and debugging issues across the Drupal site to deliver effective solutions.
- Contributed to a **Laravel** project by identifying and fixing bugs, enhancing the application's overall functionality and performance.

Web Developer (Remote)

Maverick, Auckland, New Zealand

Feb 2023 - Sep 2023

- Built websites for clients using **WordPress** and **Breakdance**, with hands-on experience in **WooCommerce** and various **WordPress plugins**. Developed a **custom wishlist plugin** tailored to client needs.
- Experienced in using **PHP**, **MySQL**, **HTML**, **CSS**, **jQuery**, and **GitHub** for version control and collaboration.
- Collaborated effectively within **teams** and demonstrated strong teamwork skills as a dependable and proactive team player.

Trainee Developer - Drupal (Remote)

OmobioNG, Colombo, Sri Lanka

June 2022 - Jan 2023

- Worked on **Dialog.Ik** project as a front end developer and content team. Gained hands on experience with Drupal CMS and demonstrated the ability to work under pressure while constantly meet the deadlines.
- Experienced in working within an **Agile** environment, actively participating in daily **Scrum meetings**, **sprint planning**. Maintained tickets in **Jira** software and collaborated closely with Business Analysts and Project Managers to ensure project alignment.
- Hands-on experience with **HTML**, **CSS**, **Bootstrap**, **jQuery**, and **Drupal CMS**, following **coding best practices** for maintainability and scalability. Proficient in using **GitLab** for version control and collaboration.

Education

HND Software Engineering

Southampton Solent University, UK (2019 - 2021)

Freelance Projects

kgninfrasolutions.com - built using **Nexj.js** and deployed on **Vercel**.
